Education

University for Business and Technology Pristina, Kosovo   **Graduation date: 2025**

- Bachelor of Computer Science and Engineering
- Specialized in Software Engineering

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript | C# | C | C++ | PHP
Frameworks: React (+ hooks) | .Net | Node.js | Next.js |Material-UI | Tailwind CSS | Bootstrap
Technology: NPM | Git | Yarn | React Developer Tools | Firebase v9 | GitHub | Trello | Slack
Databases: MS SQL | MySQL | MongoDB

Specializing in software and web development/ applications.

Work Experience

Web Developer | *Caring For Kids, New Harbor, USA*   *November 2024 – February 2025*

- **Developed and maintained** the nonprofit's website (caringforkidsbristol.com), ensuring responsive design, accessibility, and modern user experience.
- **Worked closely with stakeholders** to implement new features and content updates, supporting the organization's outreach efforts.
- **Improved site performance** through code refactoring, image optimization, and best practices in frontend development.

Software Developer | *Upwork*   *October 2023 – June 2024*

- Contributed to the development and support of client software solutions, building scalable web applications and backend systems using .NET and TypeScript.
- Designed and developed RESTful APIs tailored to diverse client needs, focusing on maintainability and performance.
- Performed in-depth code reviews and debugging, ensuring clean, efficient, and production-ready code.
- Enhanced application performance by optimizing database interactions and refactoring backend

Web Development Intern | *Roi Academy, Pristina*   *October 2021 - April 2022*

- **Collaboratively built and maintained robust web applications** using ASP.NET and C#, implementing improvements to existing functionalities..
- **Designed and implemented RESTful APIs** for seamless data exchange between web applications and backend services.

- **Championed code quality** through rigorous code reviews and debugging processes, ensuring flawless web application delivery.
- **Optimized web application performance** by streamlining database queries and refactoring code structures for efficiency.

Projects

Food Delivery System | .NET | REACT.JS
Github Links: [Back-end](#) and [Front-end](#)
Restaurant Management:
- Centralized system for restaurant registration and menu management.
- Features for managing menu items, including pricing and availability options.

Customer Interface:
- Intuitive React-based interface for seamless menu browsing and ordering.
- Search and filtering options for quick navigation through cuisines and dishes.
- Flexibility for online ordering or pickup to accommodate customer preferences.

Real-Time Tracking:
- Integration of Google Maps API for precise delivery order tracking.
- Dynamic updates displaying delivery drivers' current locations and estimated arrival times.

Microservice Architecture:
- Implemented a microservice architecture to enhance scalability and modularity.
- Used RabbitMQ for inter-service communication, ensuring seamless interaction between microservices.

FestivalSphere | Node.js | Next.js
Gitbub link: [Front & back-end](#) and [Live Website](#)
A full-stack platform for discovering, organizing, and managing music festivals. Features interactive event listings, artist and venue profiles, and real-time updates.
Event Discovery:
- Interactive platform for discovering and managing music festivals.
- Features include event listings, artist profiles, and real-time updates.

User Experience:
- Intuitive React-based interface for seamless event browsing and ticket booking.
- Search and filtering options for quick navigation through festivals and artists.

Real-Time Updates:
- Integration of Socket.IO for live event updates and notifications.
- Dynamic updates displaying event changes and user interactions.

Activities

- **Work & Travel Experience Summer 2022 & Summer 2023** – Sponsored by **CIEE(Council on International Educational Exchange)**
- **Kosovo United States Alumni(KUSA) member**
- **Coding with Mendix workshop – Mitrovica, Kosovo**
- **Volunteering – Rolling film festival in Prishtina, Kosovo – Caring For Kids in Bristol, Maine, USA**
